

## ORGANIZING FOR LIFE THE KIDS ROOM

Does the thought of entering your child's room make you shudder?

Do you dodge a mountain of toys only to notice that many are broken and haven't been touched in months?

Is there a desk under that stack of gameboys, books and yesterday's socks?

Do the size 6's fight for space with the size 8's your child now wears?

Despite our best intentions, kids' rooms often get out of control. Don't give up. Give Ann Sullivan's ASAP Approach™ to organizing a chance!

This guidebook will help you organize your child's room. It takes you step-by-step from chaos to order and leads you through an easy-to-follow, four-step process that starts with a plan and ends with guidelines to preserve your child's newly organized room.

For years, Ann Sullivan's clients and students have benefited from her ASAP Approach™ to organizing. Now you can too.

The time to get organized is now.
